Marine CCTV Cameras

Marine Environment Cameras
Our range of marine cameras are specifically designed for use in harsh marine environments. All cameras are fully protected to meet the stringent requirements for surveillance on board ships and of ports and harbours.

Camera
A range of high resolution colour/mono low light camera modules are available including:

- Megapixel IP cameras
- Analogue cameras
- Powerline with signal transmission over mains power
- Real-time and snap-shot
- Pan/tilt/zoom
- Wiper

Camera Housing
Each camera is encased in a protective IP67 certified housing to prevent corrosion and deterioration from the elements and is constructed entirely of AISI316L extra low-carbon grade stainless steel.

Signal Transmission
Video signal can be output over analogue coaxial cable, IP or in conjunction with our partners, Setel, via powerline. Powerline removes the cost and associated challenges of running network cables in a vessel environment. By injecting the CCTV signal onto the ship's powergrid, installation time and cost is vastly reduced.
Camera Dimensions

- Wall mounting bracket with swivel joint
- Corner mount adaptor
- Pole mount adaptor

Accreditation

ClearView’s marine camera range includes BS EN 60945:2002 (Maritime navigation and radio communication equipment) and BS IEC 60533:2999 (Electrical and electronic installations in ships) certified devices. We also provide Ex rated explosion proof cameras for hazardous environments.
