Objective:

Ipswich Town Football Club plays in the Football League Championship and its stadium has a capacity exceeding 30,000. To ensure the safety of the fans, and to monitor threats and pressure points, a comprehensive security system is required.

Requirements:

- fast, high resolution CCTV
- vandal resistant units
- easy search and access to recorded images

The ClearView Solution:

ClearView completely overhauled the old CCTV system, replacing the existing cameras with high specification, high resolution, tamper-proof equipment. 30 additional new cameras were installed to substantially increase coverage.

Digital recording and review systems enable the Club to produce evidential footage when there are incidents. Utilising the Club's network enables operators to access any camera to view live or recorded images.

ClearView provide proactive maintenance support to the Club, checking the equipment regularly to ensure the Club's safety and security requirements are met and showing all support by attending high profile matches.

If you are interested in a bespoke CCTV system to effectively meet all your requirements, protected by on-site reactive and preventative maintenance support, please call now on 01245 214104.
