

Facial and Text CCTV Test Chart Portable, robust and simple to use

ClearView Communications are specialists in:

- CCTV
- Intruder Detection & Alarm
- Perimeter Surveillance
- Access Control and Intercoms
- Automated Gates and Barriers
- Public Address
- Fire Safety
- Integrated Security Systems

ClearView's facial and text target kit fully complies with the recommended Home Office guidelines. It comprises a kit of components that allows operators to test systems for facial and text imagery for live and recorded CCTV.

The test is designed to measure conformity to the '100% Identify' criteria specified in the Home Office CCTV Operational Requirements Manual 2009. It also tests the system's ability to produce an accurate reproduction of a Vehicle Registration Number (VRN) and the subsequent ability of a CCTV Operator to interpret this image.

The ClearView Kit

- 2 sets of A4, high quality, colour facial images on non-reflective transparent laminate (to protect from the elements) with easy chart change system.
- 9 alphanumeric text charts, in accordance with Home Office Scientific Development Branch (HOSDB) guidelines, plus addition resolution and colour test targets.
- Sturdy tripod to support facial charts and to provide correct test height.
- Sturdy carry case/alphanumeric text chart presenter to test VRN reading capability.
- Formatted record forms to enter test results.
- Software spreadsheet to facilitate collation and calculation of test results.

Benefits

The system is portable, robust and easy to use and is an invaluable tool for any organisation wanting to test the quality and performance of their CCTV system against UK Home Office standards and guidance.
