### Objective:

As one of the capital's largest waste management providers, LondonWaste needed to monitor traffic movements across their 40 acre flagship site and improve the security. Additionally they were seeking to address the time consuming manual operation of logging vehicles' registration details at gates and weighbridges.

### Requirements:

- increase CCTV coverage across the site
- enhance security and prevent illegal dumping and theft
- introduce an efficient process for vehicle registration logging
- provide an integrated, centrally controlled system

### The ClearView Solution:

ClearView installed an integrated CCTV system with complete coverage, including ANPR. As a result LondonWaste were able to monitor and manage traffic throughout the whole site from central and local control positions. The system provides:

- improvement in overall site security
- reduced disputes and invoicing errors
- reduced theft and illegal dumping
- pre-registered vehicles automatic entry to the weighbridges via barrier control
- vehicle direction to the correct disposal area
- automatic invoice generation and an audit trail of all vehicle movements

**If you are interested in a bespoke system to effectively meet all your requirements, protected by on-site reactive and preventative maintenance support, please call now on 01245 214104.**
