

Megapixel CCTV Systems for Logistics Rendrive Haulage Ltd

- CCTV
- Intruder Detection & Alarm
- Perimeter Surveillance
- Access Control and Intercoms
- Automated Gates and Barriers
- Public Address
- Fire Safety
- Integrated Security Systems

“We were impressed with both the quality and adaptability of the systems on offer. The equipment was specified, installed and commissioned by qualified, competent and knowledgeable staff. The ability to access quality images remotely via android and IOS devices is a great feature of the system.”

Tony O'Malley - Managing Director

Objective:

Rendrive Haulage Ltd is one of the UK's largest construction haulage, general distribution and logistics companies - based in Belvedere, Kent. The company operates from 45,000 square feet of open and covered storage space. Working with a multi-occupancy site, the management team wanted to improve security monitoring of both their warehousing unit and external yard.

Requirements:

To make their premises more appealing to potential leasees, they were keen to install reliable and effective security systems. The CCTV system would need to monitor their warehouse unit and the external yard. Not only would this make the premises more attractive for new tenants, it would protect their own business.

The ClearView Solution:

ClearView were invited to carry out a site assessment and find the most effective solution for Rendrive to increase the security of their site. A new megapixel IP CCTV system was designed which enabled Rendrive to monitor their site 24 hours a day, 7 days a week.

This level of surveillance uses the latest in technology to provide clear images throughout the day as well as at night. Authorised staff are able to review footage from a centralised computer in case of a security breach.

Service and maintenance was also very important to Rendrive. ClearView provide the logistics company with regular preventative maintenance to check the running of the equipment. This ensures the system is working to its fullest potential and helps to eliminate future problems.

If you are interested in a bespoke security system to effectively meet all your requirements please call now on 01245 214104. We will be happy to provide you with more information.
